WHAT IS THE PRODUCT?

Type: Mutual Investment Fund under Luxembourg Law governed by Part I of the Law of December 17, 2010.

Term: This sub-fund is not subject to any fixed term. The Fund is established for an unlimited duration; it may be dissolved at any time with the mutual approval of the Management Company and the Depository Bank. The Fund shall be liquidated in the cases provided for in Article 22 of the Law of December 17, 2010. The Management Company may decide to enter into liquidation the Sub-Fund in case of extraordinary events such as changes in the political, economical or monetary situation or when the net asset of the Sub-Fund is less than a minimum level for the Sub-Fund to be operated in an economically efficient manner, as further described in the Prospectus.

Objectives:

The sub-fund, expressed in EURO, aims to generate capital and income growth, measured in EURO, by investing primarily in the Chinese debt instruments denominated in local currency (Renminbi) and traded on the China Interbank Bond Market ("CIBM") and/or in other regulated markets in People's Republic of China ("PRC") and Hong Kong through the Bond Connect Program. The sub-fund's strategy aims to provide a medium-term capital growth by achieving a return in excess from the return achieved by the benchmark. However, a positive performance is not guaranteed and while the sub-fund aims to achieve positive return in all market conditions, it may not always achieve this objective. The sub-fund may include fixed-interest securities, floating rate securities and non-investment grade securities. The sub-fund may invest its net assets:

- up to 100% in government, government guaranteed, agency and corporate Renminbi bonds issued by governments and government related issuers, corporations, other non-government issuers. Debt securities will typically have an average credit quality of investment grade as measured by an independent rating agency and/or by the internal valuation model implemented by the Investment Manager;
- up to 40% in debt instruments issued by Issuers with a lower quality rating ("Non-Investment grade");
- up to 40% in not rated debt instruments, which are included in the above investment limits. The credit quality is measured by the internal valuation model implemented by the Investment Manager;
- up to 10% in units/shares of UCITS and/or other UCIs, including ETFs, which provide exposure to the above mentioned asset classes;
- up to 40% in money market instruments.

The Sub-fund may invest without limitation in securities denominated in currencies other than the reference currency (EUR). The currency exposure of the sub-fund is flexibly managed. The sub-fund will not invest in distressed securities nor in default securities. The sub-fund will not invest in "ABS", "MBS" and "CLOs".

The sub fund is managed in reference to a benchmark. The benchmark consists of the index "Bloomberg Barclays China Aggregate" Total Return RMB, Unhedged, converted in EUR. The sub-fund is actively managed, and the degree of freedom allowed within the management of the sub-fund is material. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. This may impact the extent to which the composition of the portfolio and its performance deviate from that of the benchmark. The sub-fund may use derivative instruments for the purpose of investment and risk hedging. The Sub-Fund will enter into TRS. The Sub-Fund will not enter in repurchase or reverse repurchase agreements.

This is a capitalization Unit-Class which reinvests all income generated by the Sub-Fund. You may request to redeem the units held at any moment, in accordance with the Prospectus.
